

DESCO

An ESD Survey - Why?

Let Desco provide you with an ESD survey of your facility at no charge. If you are not sure your ESD control program meets the required limits of ANSI/ESD S20.20, we can help. We will send our factory trained representative with test equipment to survey your facility and let you know the state of your current program. Listed below are the benefits of having Desco as your source for ESD control information.

1. Survey your entire facility, including multiple locations, or just the area of your choice.
2. We use the latest, digital and NIST calibrated equipment
3. Desco field representatives have been extensively trained by iNARTE certified ESD technicians.
4. We compare your existing program to the required limits of ANSI/ESD S20.20.
5. We check all ESD control items used in your ESD control program including; ground system, floors, worksurfaces, personnel grounding, carts, shelving, packaging materials, material handling, smocks, ionization, wrist straps and ESD footwear.

6. You receive a written report with our measurements, observations, recommendations as well as informational comments; clearing defining how your existing program compares to S20.20.
7. Our Team will then help you choose the right methods and products to upgrade any deficiencies in your program.
8. If you don't have a written ESD Control Plan and QPL (list of products proved be used in the plan), consider becoming T.E.A.M. account and receiving additional support; we can help you write these.

No other ESD solutions provider can offer your this complete array of services and products. Get your current ESD program evalutated and tuned up now. For more details contact Desco or your local Desco Representative.
