VPCI-125 HP ESD BLUE BAGS

The VpCI-125 HP ESD Blue Bags are ideal for protecting ESD-sensitive electrical and electronic components from corrosion.

FEATURES

► **Low Charging Dissipative Film with Vapor Phase Corrosion Inhibitors**

For use with ESD-sensitive contents and where corrosion is a concern.

► **Permanent Dissipative Inner and Outer Surfaces $R_{tt} < 1.0 \times 10^{11}$ ohms per ANSI/ESD STM11.11**

Allows bag to be used throughout an ESD Protected Area and with ESD susceptible devices.

► **Vapor phase Corrosion Inhibitors (VpCI®)**

Protects ferrous and non-ferrous metals from corrosion.

► **Does not contain free amines or Prop 65 ingredients**
